**WELCOME to our iJUNGLE ILLUSTRATION AWARDS 2020!** Another year ended with a record participation: 1550 illustrations from almost 60 countries. We continue to try to publicize the work of some of the best contemporary illustrators in an affordable contest.

This year the jury detected some situations of plagiarism, particularly in the category of New Talent (Student). Please keep this in mind in future participations.

We appreciate the participation of all! Now is the time to show the public all the choices of our jury, with special emphasis on the gold medals of this contest. We hope you

enjoy this high quality exhibition as much as we like it here on the team. We hope to see you again next year!

Kind regards,  
iJungle Team

### LILLA BÖLE CZ (HUN)

Lilla Bölec z is a freelance illustrator specialised in graphic art, book illustration and surface pattern design.

Her passion is to create peculiar, thought-provoking, mystical scenes and characters. She considers artwork as a crucible of the spiritual and the material worlds. Her vision is mostly inspired by mysticism, nature, spiritual experiences, mythology and literature.

Lilla is always looking for meaningful connections, focusing beyond the illusion to discover uniqueness and the unifying theme that connects all beings. Her aim with the unconventional visual stories is to discover hidden realms and bring them to life in order to invite the viewers

Her clients include The New Yorker, The New

### GIULIA SAGRAMOLA (ITA)

York Times, Ferragamo, Feltrinelli, Harrys, OECD, Plansponsor, Boden, and many others. She won several awards including a Golden Medal from the Society Of Illustrators, for her self-publishing project Teiera. She's the author of the graphic novels "Bacio a cinque" (Topipittori), "Incendi Estivi" (Bao Publishing), and the children's books "Un drôle true pas drôle" (Rouergue), "Mon Chien Banane" (Les 400 coups). Her comics have appeared in magazines like Courier, Millie, Linus, Rolling Stone, Vita. Her interest in developing personal projects brought her to experiment with surface design, ceramic, and embroidery. In her free time, she loves drawing dogs and rollerskating.

### OLGA PTASHNIK (HUN)

Olga Ptashnik is an award-winning illustrator living in Caucasus Mountains, Russia. She finds inspiration in nature, history and philosophy. Working in an array of mediums from pencils, water colours, pastel and gouache, Olga brings projects and topics that she is passionate about into life through books and pictures.

→ We live in a time when our country is changing and self-determined. So we decided to join this search. Because, first of all, we love the truth and have made considerable efforts to dig it out for you. Secondly, we love Ukraine in all its manifestations: majestic and vulgar, political and lyrical. But most importantly - we love Ukrainians. Funny, gloomy, serious, inflammatory, freedom-loving - just **Amazing**. Ukrainians who have something to say to the world and have something to be proud of!

### **1. Can you tell us a little about yourself, where you're from, where you studied, and where you are at now?**

I am an illustrator from Moscow, Russia. I grew up in a scientist's family and thought I would become a neuroscientist. But there was always something else.

So now I have an MD in biophysics and do illustration full-time.

### **2. Why did you become an illustrator?**

As I was saying, I always had this feeling that maybe I like to draw nice dresses more than doing homework. I spent few years trying to understand what I am, I wanted to draw, to create and make use of my MD in my job. I've tried different jobs, but at the end, I've realised that I should let the degree go and enjoy drawing and creating. That was a good decision for me.

### **3. What artists/things do you most admire and how did they influence your work?**

I try to accept all artists and see their point, though of course I have some favourite. But one thing that is an inspiration in my life is nature. I think it is an undoubted good in our lives. It obviously influenced the work I am here for as it is a nonfiction book about the journey of the bird.

### **4. How did you find your style? Has it changed since you started?**

Draw a lot. And had great people around.

→ *Alice In The Wonderland. A Puzzle.*

It's a puzzle book inspired by Lewis Carroll's classic. Two children, following the White Rabbit, experience an amazing adventure in the Wonderland, visit Mad Hatter's tea party, meet Tweedledum and Tweedledee or marching playing cards. Readers must riddle their way from one page to another, cracking clues, finding hidden objects and meandering through mazes.

We are diversity. A cultural tour for the assessment and respect of the difference. Each person is unique and valuable, and therefore, what they do is also valuable. We are all born free and equal. Our duty is to behave fraternally with each other. This is what the countries have said in the Universal Declaration of Human Rights. We invite you to go through these pages and discover how the lenses through which you look shapes everything: the place where you were born, the family you grew up in.

CAPÍTULO 4

## Diversidad familiar

Cada vez que late nuestro corazón nacen tres niños. Cada vez que parpadeamos 18 niños vienen a este mundo. Cada minuto que vivimos 300 nuevas personalidades lloran para llenar por primera vez de aire sus pulmones. La vida entera se abre delante de ese ser diminuto que recién flotaba como astronauta en un vientre caliente y ahora alerta, come y mira sin ver, primero borroso, luego en blanco y negro y finalmente, en colores.

Las pequeñas personalidades observan curiosas y risueñas a quienes los rodean, los alimentan, los visten, los miman, a esos que juntaron ramas y palitos para hacer el nido blando y tibio en que todos nos reunimos. A veces son los padres biológicos, otras los abuelos y abuelas, los tíos y las tías o todos al mismo tiempo. A veces dos mujeres, otras dos hombres y a veces uno solo. Pueden ser los mismos que nos vieron nacer o pueden ser otros los que nos cuidan, nos enseñan y nos acurrucan cuando tenemos frío. Sin embargo, no importa cómo los nombremos ni cuándo nos conocimos ni cómo nos encontramos porque somos una familia.

Y es que las familias son diversas y cambiantes: se agrandan, se achican, se dividen, se quiebran y vuelven a crecer. ¡Todo es posible! Ninguna familia es igual a otra, varían de país en país y de época en época, pero cada uno de nosotros sabe reconocer esa donde nos contamos los secretos, celebramos juntos, compartimos las penas y nos abrazamos para que se pasen: ¡esa es TU familia!

¿Conoces distintos tipos de familias?

¿Qué hace especial a tu familia?

## Diversidad religiosa

La artista chilena Valeska Poma dice que es un hombre con barba y un niño de un mundo de colores que se celebra con un plato de comida, una canción, un baile, un momento de silencio, un momento de alegría, un momento de tristeza, un momento de esperanza que los que lo ven no son los que lo hacen. Ella dice: "Hay una familia que me inspira y me inspira a ser quien soy". Ella dice: "Hay una familia que me inspira y me inspira a ser quien soy". Ella dice: "Hay una familia que me inspira y me inspira a ser quien soy".

¿Conoces rituales o ritos que hacen especiales a tu familia?

¿Qué religión es la tuya?

## La cultura es viajera

La cultura es viajera. Ella viaja por el mundo, se adapta, se transforma, se mezcla. Ella es la que nos hace sentir que somos parte de algo más grande que nosotros mismos. Ella es la que nos hace sentir que somos parte de algo más grande que nosotros mismos. Ella es la que nos hace sentir que somos parte de algo más grande que nosotros mismos.

→ The Bovington Boy.  
This project is based on my interest of WW1. In 1914, the news of a political person being killed in Europe was like a stormy reaching Britain. Like thousands of young men, a lad from Bovington wished to prove his braveness on battlefield. But what he had really experienced was friend losing, eye injury, and homesickness in cold trenches. While he was missing home, a shot from enemy ended his young life.

The war was more brutal than what it could be imagined.

Eve of Great War 1914, Bovington town, Britain

A dog was carrying a helmet. Far and far, blurring and blurring. It was gone. Oh, no, gas. Gas was spreading in trenches.

My eyes hurt a lot.

Was it fighting like our ancestors?

The knitting staff kept me warm in wet trenches. I started to miss my mum.

easily find him in every detail of my work.

**4. How did you find your style? Has it changed since you started?**

I studied from a lot artists besides Peter, like William Kentridge, Mama Andersson and many photographers. My style is the mixture of what I like and what I'm able to do. And it will change to suit the commission or a story.

**5. Can you briefly describe your creative process?**

Get an idea first and find reference to enrich it. Then chose a proper medium. Testing a lot, and finish the piece painfully.

**6. Best and worst part of your job:**

I trust my aesthetic, but the composition is a pain...

### 7. Quick answers:

**Favorite movies:** There are many great movies I haven't seen, but so far the favorite is 'Once Upon a time in the West'

**Favorite musics to work:** broadcast or Alt rock.

**Favorite Hobbies:** bus travel, reading, chatting and drinking with friends.

**Magic wishes:** People I care can be happy.

**8. What is the best piece advice you've had, in regards to comics/illustration or otherwise?**

The story takes place in an era when the earth has ceased to exist. Dopamine produced by the human brain has become precious energy. The last group of humans in the universe has been captured as livestock by aliens. They all wear an eggshell screen which forces them to play VR games to produce dopamine for their captors. They don't know where they came from, who they are, or even that their reality is a lie. The VR game is their world, their entire life.

In January of 2019 I was asked to teach a 2 week workshop about comics at the TUMO Center in Yerevan, Armenia. This comic highlights and exaggerates my time outside of the classroom. When I was not teaching I explored this unlikely destination and purposely got lost in it. I discovered ancient temples, soviet architecture, abandoned stadiums, and vehicles from another era. After my trip I was commissioned to create a comic about Yerevan, so as always I told my story through BARC.

Description: 'Rapa Nui' is the Polynesian aboriginal name of Easter Island. This comic tells a story about my illusion of the origin of the Easter Island stone statue 'Moai' based on documentaries, but also incorporates a reflection on world cultures and religion beliefs. As Moai was the symbol of the power of the primitive tribes on the island, I fabricated a mythical narrative for them to emphasize the awe of its ancestors.

**1. Congratulations for winning this year! Can you tell us a little about where you are now and what's next for you?**

As it was my first time participating in such a competition, I am very excited, this is such an honour. I was born in Kyiv, Ukraine. Studied illustration at Igor Sikorsky Kyiv Polytechnic Institute and British Higher School of Art and Design, Victor Me-lamed class. I am cofounder of visual studio seri/graph, we do screenprinting and illustration with my partner Yevheniia. Also we organise a printmaking festival, PrintFest \_/100, in Kyiv. Right now I work on illustrations for a children's book about the city and how it works. I hope it will be published soon.

**2.About this year's award, how did you get this commission?**

These illustrations are for the Ukrainian online design school Projector. I've been working with them for a few years now and when it was time for rebranding they decided the new design needed some illustration.

**3.Can you tell us a little about this work? How was the development process? What were the steps you took, from the moment you got the brief, until it's ready to be delivered?**

Projector has so many different students and teachers with different experiences and different goals so I decided to go with

visualisation of this diversity of people in the area and how despite these differences it all works together. I also teach illustration and this experience helped a lot during the work.

**4. What do you think people enjoy the most about your work?**

I hope it is fun. At least it was fun doing it. I hope the viewers are always surprised with each new character or situation.

**5. What tools do you use to draw?**

Adobe Photoshop, mostly. Several characters are hand-drawn and then scanned.

**6. What is your favorite thing in the world to illustrate?**

At the moment, I guess the most interesting thing for me is to tell my stories. It would be great to make a picturebook on a topic that I care about, being honest and frank. But I don't think I have the holy grail, something that I would always dream to draw. I am changing and desires are changing with me.

**7. What does a day in your life look like?**

I guess it is a regular freelancer day. I wake up, have breakfast and go to work. Depending on the day I can go to our studio nearby or stay at home to work. In the evenings I have online meetings a couple times a week, I te-

### 8. Do you have any advice for younger illustrators?

It will be boring advice, but draw a lot. Do not draw mindlessly, always analyze what you are doing and why. Everything will be good if you are enjoying the process and can't wait to get to work. Above all, illustration is fun.

Done for HBO as a campaign for their show PATRIA (about how ETA affected basque society), this illustration was painted on an umbrella and shown in an exposition with more artist. My take focuses on how an issue like that affects the social fabric of people: whereas they all were protagonists of their own struggles, the main protagonists were the changes that happened in the bonds between each other – they tensed, snapped, broke... And some even got mended afterwards.

**1.Can you tell us a little about yourself, where you're from, where you studied, and where you are at now?**

My name is Laura Liedo, I was born in an inland Asturias village 34 years ago. I studied Advertising and Public Relations in Segovia and finally I ended up in Barcelona doing a postgraduate course in creative illustration at Eina school.

I've been living in Barcelona for 10 years, now near the beach.

**2. Why did you become an illustrator?**

I always liked arts, image, creativity but I never weighed up illustration as an option. One day I went to an illustration fair in Barcelona, full of fanzines, prints, beautiful magazines... I was fascinated and I wondered... Could I do this?

**3. What artists/things do you most admire and how did they influence your work?**

I admire so many artists and illustrators... Matisse, Miro, Pablo Amargo, Luke Best, Cristóbal Schmal, Romy Blümel... they have influenced me in colour, form, compositions and concepts.

I feel very grateful to all of them. They have sown seeds in me and opened windows to other possibilities, other ways of seeing beauty.

**4. How did you find your style? Has it changed since you started?**

In my early days I experimented with different styles. It was a very necessary step to get to know myself, to see where I felt comfortable and where I felt frustrated. My style has been a mixture of my limitations and what fascinates me. It has happened organically. And it continues evolving.

I was inspired by a piece of real news in the early 20th century: "A German called August Engelhardt and his followers insisted that Coconut was the divine fruit, and stuck to only eating Coconut every day. In the end, they died from malnutrition." It was used as a metaphor for a social phenomenon of following some food blindly. And I referenced the famous painting *The last Supper*, which features morals of religion and faith. I drew it in a form of absurdity and irony. The title is German, it roots in a religion which was established by August of advocating eating coconuts, which was also referred as "Coconut Sect".

What is the history? In the context of the sun as a writer, the development of this sun-centered ecosystem is called history. The sun, as the founder of the light and everything, monopolizes the ultimate interpretation of the history. While the moon is a bystander, an outsider, the other. A footnote, a reflection, and a punctuation. "Wait," The sun said, "You were not born at that time, you cannot be a participant in history." The sneering moon no longer obeyed: "How can a me without the right to write history write the present and the future?"

The Past On The Railway.  
It took nearly 150 years from the first train entering China to the Fuxing bullet train coming into service. The railway has transformed from the exclusive toy of the emperor to the daily travel tools of the common people. It witnessed China's present self-improvement from the past poverty. The slow-moving green carriages had transformed to high-speed rail, which shows the new style of Chinese nation. The small carriage carries too much emotions of the Chinese people.

Life in Isolation is a collection of illustration I did in response to the pandemic situation while I was locked-down in a tiny room of a student house, when the outside was suddenly become an inhospitable place. As an international student I was feeling homesick, my country -Italy- had been devastated by the pandemic. The octopus in my illustrations represents the responsibilities heaving on me during the pandemic, but also a sense of alienation I got to feel while isolating for months.

My motivation to make this illustration is to draw attention to how has the Coronavirus impacted people's lives in New York City. After the outbreak, I decided to create a piece of art that captures the atmosphere of the city and the optimistic lifestyle of all citizens. The image was drawn based on the research of the local buildings' photographs and some local newspapers.

This image shows my support for the Black Lives Matter campaign. The burnt flowers are a tribute to all the lives that were lost due to racist murders. Following the outbreak of Covid-19, I've heard many stories from my fellow friends who've also been discriminated against because of their race. The incident with George Floyd is heartbreaking, and it is just one of many cases that have been happening all the time. Since the Covid-19 outbreak has been spread all over the world, there are fewer and fewer pedestrians walking on the city streets. For hunger or curiosity or reduced pollution, the animals come out and wander around the city, which is surreal to me. So I thought: Have we taken up too much space? When we human beings are "locked up", the nature shows us such a big change. So what would the world be like if one day humans really disappeared due to a great plague and animals replaced human life?

Loneliness is a Friend of Mine. The picture book tells a kid who has lonely moments and trauma has a friend Loneliness. Loneliness acts as a role who comforts, supports and understands her. With the accompany with her special friend, she learned to be kind, faced her trauma and be opened to help others.

Loneliness has a LOT of things to do. Staying with elderly people who live alone.

Accompanying other kids who get lost.

When an adventurer embarks on a new journey, he is right there by his side.

Loneliness is as busy as a bee, I can't imagine how hard he works!

I still remember that awful moment, when I lost myself in the Sadness Ocean.

The Loop.  
People living in society have to disguise themselves and become another person, they may wake up at a certain moment and find themselves lost and start looking for them-selves. Sometimes this process will turn around, but it is often just a loop.

Forget to fall...death, forget how a mountain fell  
How to flow out, disperse, run into the woods, then disguise as a tree.

To go through a dead forest, the cylinder hides herself, she may think it is safe, especially in the dark.

I will go, but I don't know where I will arrive.

The water can over the grass and she was lucky to catch the train to the distance.

The split part of the slate forms the outline of the house, it stands quietly there...

One foot suddenly pops out from the inside and escapes.

I know I will find the answer, I will find myself.

The world inside looks wonderful and strange, I only pray not to get lost.

This is probably a factory, they look like a very large on the conveyor belt.

There is a suffocating silence in the air, and if I were not for those hands

→ You & I.

You and I won't be able to fully understand each other. Maybe, you and I can only see few pieces of each other. Maybe, you and I only see what we want to see from each other. But we know, that does not limit us from showing that we love each other. And maybe, that is all we need, for me and you to love each other. And that is what this work is about.

**1. Can you tell us a little about yourself, where you're from, where you studied, and where you are at now?**

My name is Kyoosang Choi. I was born in Korea where it has 4 beautiful seasons, grew up in places where it has seasons upside-down, New Zealand, where snow never stops, Saskatoon Canada, in rainy New York, and now I'm living in Los Angeles under endless sunshine. I have studied illustration at the School of Visual Arts in NYC, where I met the most inspiring friends, artists, and teachers of my life. Although rather unexpectedly, my faith introduced me to the most important person of my life on the other coast of the continent, where I live now. Here, I'm working as an illustrator and a muralist, planning and dreaming my next journey in this small world, this time with somebody.

**2. Why did you become an illustrator?**

I've always liked to draw as far as I can remember. I never took it seriously as my career until one day, I just knew that this is what I was meant to do. It was a simple but powerful instinct. So I decided to dedicate my life to art whatever it takes. I don't necessarily find the exact boundary between artist and illustrator, but I chose to attend an illustration major in college. It was an off the cuff decision but I may have thought I want to tell stories not only of my own but also of others, the world, and everything included. As an artist or an illustrator, I just try to deliver as many stories, messages, and beautiful stuff as far as my life goes.

**3. What artists/things do you most admire and how did they influence your work?**

I was always fascinated by our mortal desires towards the immortal world, expressed in forms of art, religion, philosophy, mathematics, and so on, and I have always admired the remains of the history of our desire. From the sorrow of Goethe to the touches of Rubens, I try to dissolve and pour them into the works I make. There must be hundreds of figures I would love to mention, but just to mention one, I must mention that Rene Magritte's works teach me how to stay poetic and sophisticated at the same time.

**4. How did you find your style? Has it changed since you started?**

I don't yet too sure if I have a style, but I certainly like to work with paradoxes in my works. When I first started to study art, I was looking for something like a grand unified theory of art. I really thought I could find such a thing. But I gradually learned that there is no such thing. Everything had two or more sides to it, and nothing could be fully defined. So I started merging opposing aspects, theories, elements, etc, or paradoxes into works, looking for harmony among them to understand the world as is. I consider that way of making work has become my thing now.

**5. Can you briefly describe your creative process?**

I dream. I read. I make. Simple and repetitive.

### 6. Best and worst part of your job:

I would like to say the worst part first since there are a lot more good things about being an artist. The worst for me is irregularity. Oftentimes I get part-time jobs to pay my bills while working on the things I really want to, which oftentimes does not pay. And my day-and-night cycle must be quite more irregular than most of the people. A lot more pros to being an illustrator though, such as having control over my time and location, also being able to explore boundless subjects and stories in the world every new project I work on. But the best part of my job definitely is the ecstasy art gives when I feel like I made something I can call it "beautiful".

### 7. Quick answers:

**Favorite musics to work:** Radiohead, AC/DC, SongChangSik

**Favorite Hobbies:** Watch movies, Read Books, Play games

**Magic wish:** Can a day be like 48hrs?

### 8. What is the best piece of advice you've had, in regards to illustration or otherwise?

I like to often remind myself "this too shall pass". When things are bad it gets me going, when things are good it cools me off, and either when my life is interesting or boring it makes me get out there and look for something new. I think the phrase works for illustrations too. A work of art is a sum of one's traces. And of course, not every trace can be perfect. But if we stop, no art can be made.

→ I started this year by quitting my day job and becoming a full time freelance illustrator because I believed it was time to take the risk and follow my dream job. As the year has gone by, I have found myself accepting almost every design project that comes my way out of fear of not getting any more work, wasting time handling clients and reducing the time I put into illustration and passion projects to the point of not doing any. This piece is about the frustration I feel about all of that.

←The Moon & Sixpence. This is an ongoing project done in homage to the painter Paul Gauguin and the novel *The Moon and Sixpence* by W. Somerset Maugham, whose story was inspired by Gauguin. Gauguin treated art as a meditative approach to find the meaning of life and a primitive ideal. His artistic style reflects his attempt to describe raw and untamed nature of life itself. This is my take on re-interpreting his style of the primitive arts in Africa and Asia.

I drew two pieces for their week  
22 and 24 prompts respectively,

prompt. For week 22, I framed the

depicted people I thought would've  
set up the still life.

This project is reproducing a 90s Chinese animation named Rubik's Cube Building, which is about a young boy fell into a Rubik's Cube by accident, and this building is made out of 26 fantastic cities. The interesting part of this project is about rethinking the ancient cartoon with the current cognition. As more and more Chinese science fiction is translated into English and other languages, it is the perfect time to translate them into visual art.

Cao Xue collected life fragments like tickets, maps, cards, when living in London, and later created hand-drawn illustrations on them taking memories as the theme. The carriers (tickets, maps, etc.) represent the existence of the external being, while the content is an internal response toward the objective world.
